Summary of the project:

Facing the ever-bigger tides of clandestine immigration, which jeopardizes thousands of people, especially young people. The European countries increase their actions to regulate the migration and try also to restrict the numbers of traffickers who make money by endangering the hopeless immigrants. Many of them are confined in some retention centers where their basic human rights are not respected.

As far as the Maghreb countries are concerned, they have launched many actions to make the youth aware of the dangers caused by the clandestine immigration. However, these efforts cannot be successful without an efficient cooperation from the countries of the "Euromed zone". The organizations who work with youth take an important part in raising young people's awareness about the dangers implied, and should enhance their hopes, so that they latter can play an active role within their community.

In this context, we want to implement a project in partnership with NGO from Italy, France, Tunisia, Morocco, Greece and Algeria. Our aim is to struggle against the clandestine immigration and inform the youth about causes and consequences, by means of theatrical practice, which is valuable as a tool of promoting and defending the human rights. The beneficiaries of the project will share their experiences and good practices, apply innovative methods of non-formal education, centred on the theatre, and get actively involved in the struggle of the local communities against this humanitarian and social problem.
